## Heh, Where Did the Financial Posts Go?!

Right here: <http://market-ticker.denninger.net>

I moved them into their own blog, and also moved the publishing of my primary blog onto my own server.

Unfortunate, comments were lost. Sorry about that - it was unavoidable when the move happened - Blogger doesn't know how to "move" a post between blogs, so it had to be done this way.

This will separate out my financial "stuff" from everything else...

So - read here if you'd like my generalized comments on political events, and over at <http://market-ticker.denninger.net> if you're interested in my view of the markets.

Or - subscribe to and read both!
